Frontend Technologis:	Html, CSS
Libraries/Frameworks:	Javascript, React, Bootstrap
Tools / Platforms:	VS Code, Jupyter Notebook
Operating System:	Windows , Ubuntu
Databases:	Postgresql

Projects / Open-Source

1) The Laundry Management System | [Link](#)

The Laundry Management System streamlines and automates laundry operations, from order placement to delivery, by managing inventory, tracking orders, and scheduling pickups and drop-offs. It enhances efficiency for businesses and individuals while offering a seamless, user-friendly experience. Future advancements may integrate AI and IoT to predict demand, optimize resources, and accelerate processing. With mobile app integration, users can benefit from real-time tracking and eco-friendly practices like reduced water and detergent use. As urbanization grows and convenience becomes essential, the system provides businesses with a competitive edge and customers with reliable, efficient, and personalized laundry solutions. We have used HTML , CSS, Bootstrap, React, Javascript and MySQL.

2) Employee Management Sysytem | [Link](#)

HTML CSS Javascript

Developed a responsive Employee Management web app featuring CRUD operations, a modern neumorphic user interface, input iconography, and animated stackable toast noti cations for user feedback.

Using HTML5, CSS, and JavaScript.

Certifications

Certification Of React BootCamp - Letsupdgrade.

Certification Of SQL BootCamp - Letsupdgrade.
